## PROFESSIONAL SUMMARY

Frontend engineer with 9+ years of SaaS experience in JavaScript, TypeScript, and API integrations - with production work across React, Vue, and Angular. I own complex features end-to-end and bridge product, engineering, and business stakeholders; the best technical work is the kind that actually makes sense to the human on the other side of it.

## CORE COMPETENCIES

React & TypeScript

Vue & Angular

REST APIs & Webhooks

Component Systems

Accessibility (WCAG)

API Integrations

Cross-functional Delivery

Stakeholder Translation

## EXPERIENCE

### Recharge

August 2022 - April 2026

#### Frontend Software Engineer (React, TypeScript)

- Owned the wizard-based flow setup experience across a suite of upsell and post-purchase features, translating complex merchant requirements into reliable, user-facing interfaces in partnership with Product, Engineering, and GTM teams.
- Contributed to an early accessibility audit of the client-facing subscription widget, collaborating with adaptive technology partners to identify integration gaps across a diverse merchant base.
- Brought user-experience judgment into engineering decisions and roadmap discussions; advocated for user-centered outcomes through product intuition and design sense, influencing prioritization across engineering and product.
- Built a Claude Code skill committed to the codebase for LLM-assisted review of feature implementations - designed to run pre-PR and during code review.

### Sleepme

April 2022 - July 2022

#### Frontend Engineer (Vue, Nuxt)

- Architected integration layer connecting Nuxt frontend with Strapi CMS, enabling non-technical site managers to own content workflows and reducing ongoing engineering dependency.
- Led middleware overhaul to support a full company rebrand, aligning technical architecture with evolving business requirements under tight timelines.

### Gitwit

September 2021 - April 2022

#### Software Engineer (React)

- Led frontend rewrite of a \$2M/year COVID child-care benefits platform serving essential workers, navigating complex compliance, accessibility, and data sensitivity requirements across multiple stakeholder groups.
- Delivered company-wide presentation on web accessibility standards, driving organizational alignment on technical requirements with measurable impact on product quality.

## The Taproom

September 2020 - September 2021

### Frontend Developer (Shopify, Liquid)

- Built and maintained DTC ecommerce solutions for enterprise clients including Nestle, Copper Cow Coffee, and InsideTracker; managed client relationships and translated business requirements into technical deliverables.
- Developed middleware integration connecting Shopify with third-party vendors, with deep knowledge of API connectivity and partner ecosystem management.
- Built custom subscription and theming solutions in direct collaboration with client stakeholders; aligned on requirements, scope, and tradeoffs to ship on time.

## Gravity Works Design & Development

April 2018 - September 2020

### Frontend Developer (DNN, Drupal)

- Delivered client-facing training and platform presentations, building stakeholder confidence and enabling self-sufficiency with content management systems.
- Developed accessible, standards-compliant websites (WCAG) across DNN and Drupal CMS platforms, collaborating directly with clients to define requirements and validate solutions.

## Intellicom, Inc.

August 2016 - April 2018

### Frontend Developer (JavaScript, HTML/CSS)

- Consulted directly with clients to gather technical requirements and design tailored CMS solutions; managed email hosting, web hosting, and DNS as end-to-end technical partner.

## Vipa Solutions / Activation Insights

May 2014 - August 2016

### Front-End Web Developer (JavaScript, HTML/CSS)

- Built client websites for regional and national brands including Runza and Nothing Bundt Cakes, and contributed frontend work to ActivationHUB, an internal martech venture for event analytics and ambassador tracking.

## Sandhills Global

February 2010 - May 2014

### Web / Graphic Designer

- Designed and built client websites as a value-add for advertisers at a national ag and equipment media publisher; managed stakeholder relationships with business owners across ag, construction, and fleet industries.

## EDUCATION

---

University of Nebraska at Kearney, **B.S. Multimedia**

2009

## SKILLS

---

**Languages & Frameworks:** JavaScript, TypeScript, React, Vue, Angular, Python, PHP, HTML/CSS, Tailwind, Bootstrap

**Integration & Data:** REST APIs, OAuth, Webhooks, GraphQL, SQL, MongoDB, SSO, SFTP, third-party vendor integration

**State & Testing:** React Query, Redux, Jest, React Testing Library, Cypress, Storybook   **AI Tooling:** Claude Code, Cursor

**Product & Collaboration:** Agile, Scrum, backlog refinement, stakeholder management, product discovery, requirements writing

**Tools & Platforms:** Git, Segment, Figma, Adobe CC, DNN, Drupal, WordPress, Strapi

## LEADERSHIP & COMMUNITY

---

**Women's ERG Co-Lead**, Recharge, 2024-2026   **Board Member**, Tulsa Girls Art School, 2025-present

**Technology Advisory Committee**, USD 326, 2019-present
